Anton **Rechenauer**

IT Systems & Network Administrator | Infrastructure · OT Networks · Security

Regensburg, Germany / +49 1525 3612827 / antonrechenauer@gmail.com / linkedin.com/in/antonrechenauer

TECHNICAL SKILLS

Networking
Switching & VLANs, Cisco, Aruba, HPE IMC; firewalls FortiGate and Palo Alto; IT/OT/DCS network separation

Monitoring & OT Security
SolarWinds Orion NPM, Claroty CTD, Aveva/OSIsoft PI

Servers & Directory
Windows Server, Active Directory, WSUS; Linux (Debian), SCO Unix; legacy Windows Server 2008

Virtualisation & Backup
VMware vSphere, Hyper-V, Veeam; server hardware (iLO/iDRAC), RAID & storage

Databases
SQL Server, PostgreSQL, MySQL

Scripting & Development
Python, SQL, VBA/VB6, Scala, Java, .NET, Git

EDUCATION

Diplom in Mathematics
University of Regensburg, 1998 – grade “very good”

Graduate studies at Brandeis University, USA (DAAD, 1996 – 97); research associate, Regensburg (1997 – 2000)

Industrial clerk (IHK)

FURTHER LEARNING

79 MOOCs with certificates, incl. Introduction to OpenStack (edX), Google Cloud ML Engineer, Deep Learning (deeplearning.ai), Big Data with Spark

LANGUAGES

German	native
English	fluent

PROFILE

Systems and network administrator with 25+ years in IT. For the past four years I ran the process control network (PCN) of a refinery site – directory services, virtualisation, backup, switching, firewalls and network monitoring in a 24/7 production environment where availability and segmentation are non-negotiable. Long background in Linux server and database administration and in software development, which I use to automate and document the infrastructure I operate. Used to working independently on site, from switch CLI and server room to audits, change requests and project delivery.

EXPERIENCE

2022 – 2026
IT Administrator, Process Control Network LyondellBasell, Münchsmünster refinery

- Operated the site’s PCN infrastructure: Active Directory, WSUS, VMware vSphere and Hyper-V hosts, Veeam backup, SQL Server.
- Configured and managed switches and VLANs (Cisco, Aruba, HPE IMC); installed and configured FortiGate and Palo Alto firewalls.
- Set up network monitoring and OT asset visibility with SolarWinds Orion NPM and Claroty CTD.
- Kept legacy systems running alongside current infrastructure: SCO Unix, Windows Server 2008, VB6/Access applications, OSIsoft PI.
- Led hardware and software projects for new infrastructure from requirements through implementation.

2018 – 2022
Lead Scheduler & IT Consultant LyondellBasell, Münchsmünster refinery

- Administered PostgreSQL, built data interfaces and Python automation for the planning systems; SAP/Fiori key user.
- Lead scheduler for the 2021 turnaround – a 100M project completed on time and on budget.

2008 – 2009, 2012 – 2015
IT & Project Consultant Nigeno AG at Ruhr Oel / LyondellBasell

- IT services for the TA2008 and TA2015 turnarounds: SQL Server and Analysis Services, VMware, SharePoint site administration.
- Built an ETL tool loading about 100 heterogeneous sources into SQL Server, and a generator for about 40,000 linked HTML pages.

2016 – 2018
Project Lead & Senior Developer K-Tronik for e.solutions, Ingolstadt

- Navigation module of an automotive infotainment unit (ARM, Linux, QNX); supplier and OEM coordination, architecture reviews.

2010 – 2012
Teacher, Mathematics & Physics Albertus-Magnus-Gymnasium, Regensburg

2000 – 2008
Co-founder & Lead Developer Nigeno AG, Regensburg

- Administered Debian Linux servers (Apache, Tomcat/JBoss, MySQL, PostgreSQL) remotely via SSH.
- Lead developer of web and desktop applications (PHP, J2EE, .NET); wrote tender and performance specifications.
- IHK examiner for Certified IT Systems Manager and lecturer in software engineering (2005 – 2008).
